## Start a Food Drive

### Tips for Successful Food Drives

- It's always a good idea to start planning early!  
Have an event coming up like a sports game, concert recital, school play, holiday party or family gathering? Turn it into a food drive!
- Almost any event will work as a food drive, just ask the people that are attending to bring a couple of cans along to help those in need.
- Get the word out! – There's no sense in holding a food drive if no one knows about it! **Let us help you to promote your efforts by developing a flyer, promote on Social Media and supply boxes.**

Food drives are a great team building activity for groups or individuals.
